e34song@uwaterloo.ca | (647) 564-6754 | [GitHub](#) | [LinkedIn](#)

TECHNICAL SKILLS

- **Languages:** Python, Java, C++, C#, JavaScript, TypeScript, SQL, Racket, Perl, HTML/CSS
- **Frameworks:** React, React Native, Node.js, Express, Supabase, Firebase
- **Tools:** Docker, Git, GitHub Actions, REST APIs, VS Code, Linux, Bash

WORK EXPERIENCE

- **Web Developer** Sep 2025 – Nov 2025
DoBetter.love Remote
 - Executed structured testing workflows for mobile app features, focusing on UI/UX, navigation, and edge-case validation.
 - Filed detailed bug reports with reproduction steps, logs, and severity notes to accelerate fix turnaround times.
 - Re-tested patches, verified regression fixes, and ensured consistent builds before release cycles.
- **Mobile App Developer** Jul 2025 – Aug 2025
AIXFF Vancouver, BC
 - Built a full storefront prototype in React Native/Expo with product listings, search, filters, and item-detail pages.
 - Designed a modular mock API service layer and application-wide state management using React Context.
 - Optimized UI structure, navigation flows, and component organization for clarity and scalability.
- **Junior Software Engineer** Feb 2023 – Nov 2023
North P&D Toronto, ON
 - Developed React UI components and improved page responsiveness, layout, and accessibility.
 - Performed cross-browser QA, resolved layout breaks, and reduced UI defects across builds.

PROJECTS

- **UW Course Planner** – React/TS/Supabase: Interactive course-planning tool with drag-and-drop term organization, real-time filtering, OAuth login, and dark mode.
- **Discord Mute Bot** – Python/discord.py: Permission-safe vote-muting bot with server-side configuration and logging.
- **YT-DLP-GUI** – Python/Tkinter: Feature-rich desktop app for YT-DLP with dark mode, auto-updates, presets, and PyInstaller packaging.

HACKATHONS

- **UTMIST AI Squared Tournament** 2025
University of Toronto Toronto, ON
 - Achieved a Top-8 finish at the UTMIST AI² AI/ML hackathon by designing and implementing a functional machine-learning prototype.
- **Go on Hacks** 2025
University of Waterloo Waterloo, ON
 - Won Best Pitch at Go On Hacks for the project LeReplacer, a browser extension built with JavaScript, HTML, CSS and Node.js that detects faces and replaces them with a custom image in real time.

EDUCATION

- **University of Waterloo** Expected Apr 2029
BMath – Honours Mathematics Waterloo, ON
